EE790: Course Description: Research in any field of electrical and/or computer engineering subject to approval of the student’s PhD advisor and the director of Graduate Studies. This course can be taken prior to the qualifying examination, but will not count for pre-qualifying examination residency credit. This course may be repeated to a maximum of 18 credit hours. A student can take 1 – 9 hours of EE 790 credit per semester.

Prerequisite: Registration for this class can be done via application to the DGS only. To register you must be a PhD student who has either completed pre-qualifying course requirements, or who is in the last semester of completing pre-qualifying course requirements.

Course Requirements: The student must attend at least four official ECE Seminars (or all of the ECE Seminars if less than four seminars were offered) during the course of the semester. OR, the student can give a one-hour presentation for the ECE seminar (must receive approval from the ECE Seminar director) and attend one additional seminar. The student must also prepare and turn in to the DGS the current draft of their PhD qualifying exam proposal. Note that the proposal does not have to be completed, however, the student should show progress in the proposal during the course of the semester. The amount of progress should be proportional to the number of hours the student is registered for in EE 790. The submitted proposal draft must be signed and dated by the student and the student’s PhD advisor.

Grading: The student will receive 12.5 points per seminar attended and 37.5 points for presenting a seminar (A maximum of 50 points for seminars will be allotted). The qualifying exam proposal draft is worth a maximum of 50 points.

Final Grade: A letter grade will be assigned for this course. The following point distribution will be used to determine the grade: 90+ (A), 80 – 89 (B), 70 – 79 (C), < 70 (E).
